

PRESS RELEASE FOR SAKASTI SKINIC

HydraFacial™ Technology Makes Splash in Skin Care

Sakasti Skinic, the First in India to Offer this Treatment

Mumbai, MAHARASHTRA – 18th May, 2011 – A new technology called HydraFacial™ is making a big splash in the skin care market. Sakasti Skinic, a complete skin-care solution provider is the first institute in India to offer this non-invasive, non-irritating, serum-based skin resurfacing system.

With results comparable to more aggressive chemical peels and microdermabrasion without the discomfort or downtime, clients are finding this new approach, a refreshing and relaxing alternative.

On the occasion of first anniversary, Sujata Naik, the founder & cosmetologist of Sakasti Skinic says; “We are glad to introduce HydraFacial™ in India. The results are remarkable. It’s a wonderful advance for skin health and we are very excited to offer this treatment.”

The exceptional effectiveness of HydraFacial™ is due to its use of specially formulated serums in combination with a vacuum-based skin abrasion tip. This 30 minutes treatment enhances the richness of skin through continuous hydration providing immediate results. HydraFacial™ removes dead skin cells and impurities while bathing the healthy underlying skin with deep cleansing, extracting, exfoliating and antioxidant serums. The proprietary serums are clinically formulated to improve the appearance of fine lines and wrinkles, congested pores, hyper-pigmentation and acne-prone skin.

The patented disposable HydroPeel™ tips have a multifaceted spiral construction which increases the time the serums are in contact with the skin, while also providing superior exfoliation by presenting multiple planning surfaces. The result is a cool, comfortable, painless process that leaves the skin radiantly clean, refined, moist and polished.

HydraFacial™ is appropriate for most skin types including thin or aging skin, ethnic skin and oily skin. The technology was developed by Edge Systems Corporation, a worldwide leader in manufacturing aesthetic and medical devices. Located in Southern California, the company is known for its high quality, leading edge skincare products and systems.
