INTERNATIONAL THERAPIES

LASER HAIR REDUCTION

Permanent reduction of unwanted facial/body hair

This is a tested, clinically-proven method of laser hair removal. Is relatively quick, gentle and removes unwanted facial/body hair without damaging surrounding skin. The NDYAG machine is FDA approved and offers safe and painless treatment.

For: Face. Any part of the body.

LIMELIGHT FACIAL

Removes freckles, age spots, sun damage & tiny veins

Improves skin tone, surface imperfections like freckles, age spots and tiny veins associated with aging and photo damage. Is an exceptionally effective skin rejuvenation treatment.

For: Face. Decollete. Back. Hands.

LASER GENESIS

Fine lines, open pores & improved skin texture

Utilising non-invasive laser technology, Laser Genesis works on uneven skin texture, fine line, wrinkles, excessive redness, large pores and scars. It's ability to produce new collagen formation results in taut, lifted skin.

For: Face. Neck.

TITAN

Skin tightening

Titan helps turn back the clock on ageing skin. It's use of safe infrared light, to heat the dermis well below the skin's surface, causes immediate collagen contraction resulting in tighter skin. This process stimulates new collagen growth which helps in the improvement of lax skin, folds and lines.

A single session does produce good results among some, but 2 to 3 sessions can get optimum results.

For: Face. Neck. Arms. Abdomen. Any area where the skin is in a lax state.
